PRODUCT DATA SHEET

Polypropylene

MSC64T20

Polypropylene Mineral Filled Compound

Description

MSC64T20 is a 22% mineral filled polypropylene compound intended for injection molding. The material is available in technical black "9502", but can also be color-matched on request.

Typical characteristics

MSC64T20 can be described with following typical characteristics:

Easy processing Good thermal stability
High rigidity Low volatile content

Applications

MSC64T20 is intended for following applications:

Automotive interior applications

Under the bonnet components

Trunk claddings Cowl vent grilles

Structural interior parts

Physical properties

| Property | Typical value * | Unit | Test method |
|---|-----------------|---------|----------------------|
| Density | 1050 | kg/m³ | ISO 1183-1 |
| MFR 230°C/2.16kg | 12 | g/10min | ISO 1133-1 |
| Flexural modulus (2 mm/min) | 2200 | MPa | ISO 178 |
| Tensile strength (50 mm/min) | 28 | MPa | ISO 527-2 |
| Heat deflection temperature A (1.80 MPa) | 64 | °C | ISO 75-2 |
| Coefficient of thermal expansion (-30 °C/80 °C) | 56 | μm/mK | Borealis test method |
| Charpy impact strength, notched (23 °C) | 4.2 | kJ/m² | ISO 179-1/1eA |
| Charpy impact strength, notched (-20 °C) | 2.3 | kJ/m² | ISO 179-1/1eA |

^{*} Data should not be used for specification work

Values determined on standard injection molded specimens conditioned at 23°C and 50% relative humidity after at least 96 hours storage time.

Processing techniques

This product is easy to process with standard injection molding machines. To avoid residual humidity from transport or storage, the material should be pre-dried approximately 2h at 80°C. Following parameters should be used as guidelines:

Polypropylene

MSC64T20

| Processing setting | Typical value/range | |
|---------------------|---------------------|--|
| Feeding temperature | 40 - 80 °C | |
| Mass temperature | 210 - 250 °C | |
| Back pressure | low to medium | |
| Holding pressure | 30 - 60 bar | |
| Mould temperature | 30 - 50 °C | |
| Screw speed | low to medium | |
| Flow front speed | 100 - 200 mm/s | |

The actual conditions will depend on the type of equipment used.

Product compliance documents

Latest versions of product safety information sheets (PSIS), product safety data sheets (SDS) and other product liability documents are available in our website www.borealisgroup.com.

Sustainability aspects

Borealis is ever mindful of the impact of our products on the planet. We promote Design for Circularity (DfC) and Design for Recycling (DfR) to conserve natural resources and to reduce the environmental impact of products over their entire lifetime (including production, use phase and after phase). DfR helps ensure that material can be effectively recycled while maximizing the material performance efficiency.

Further information on sustainability and Design for Recycling (DfR) can be found from our websites www.borealisgroup.com and www.borealiseverminds.com.
